Scroll to browse questions

HomeScreen

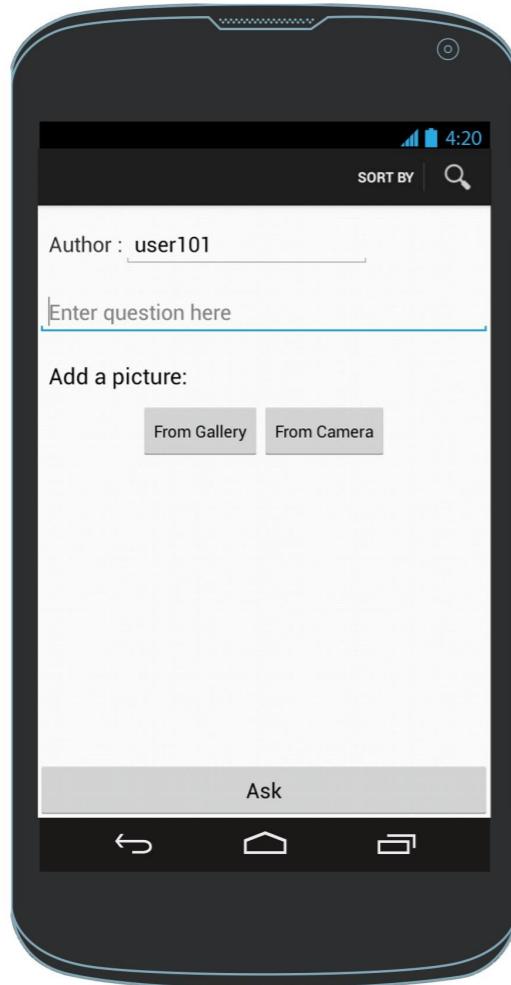

Screens reachable directly from the navigation drawer

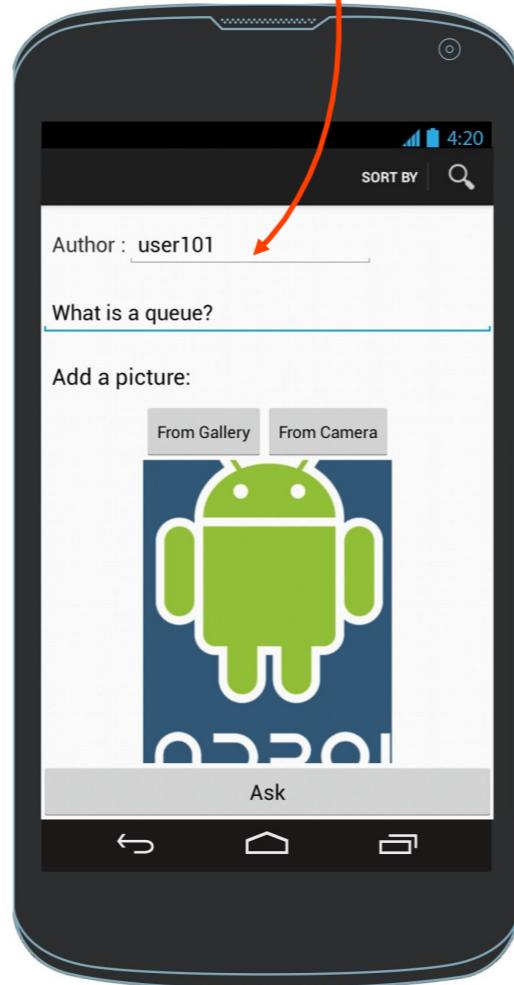

Note: So far, the navigation drawer is accessible from any view **except** AskAQuestion & AddAnAnswer screens which are separate activities while all screens reachable directly from the navigation drawer are fragments

Variants of AskAQuestion Screen

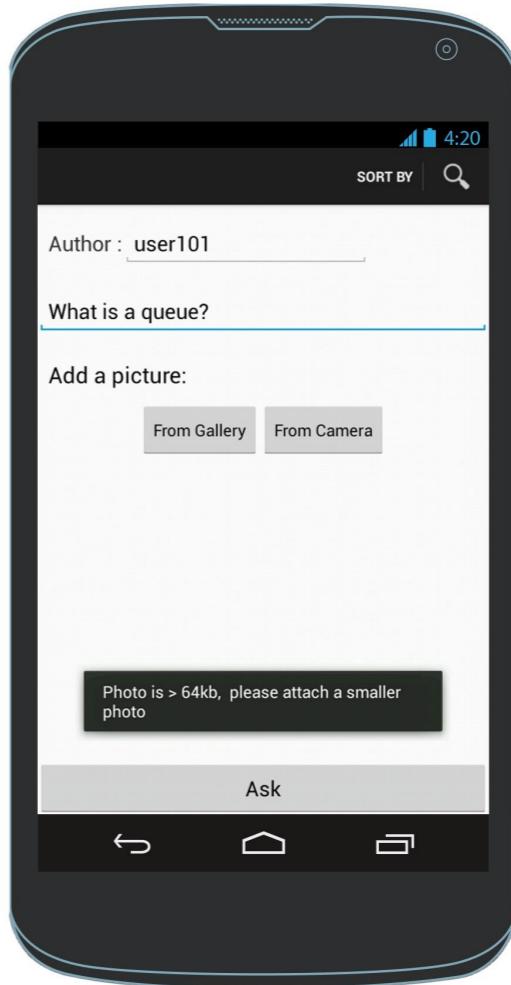

By default, Author edit text box shows the set username
But the user can change it directly here also.

Default

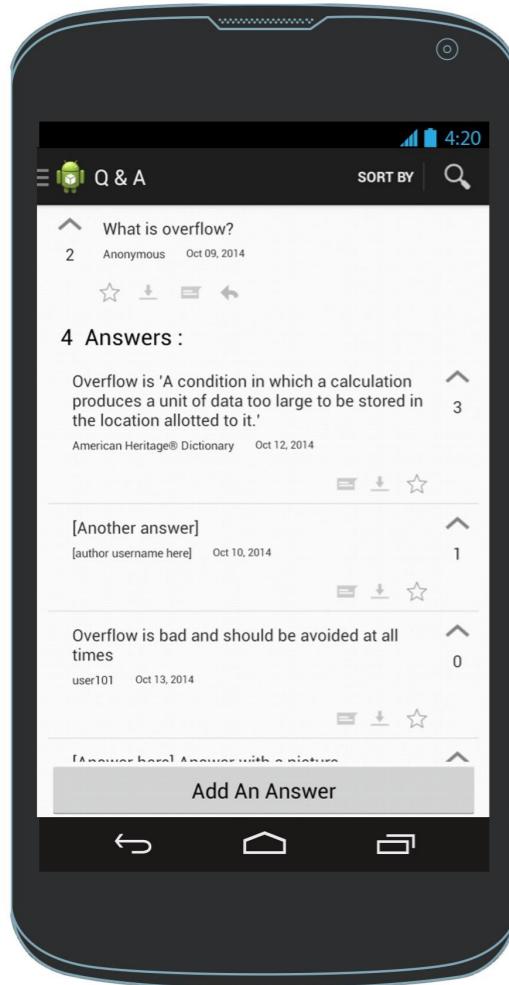

Successfully attached photo

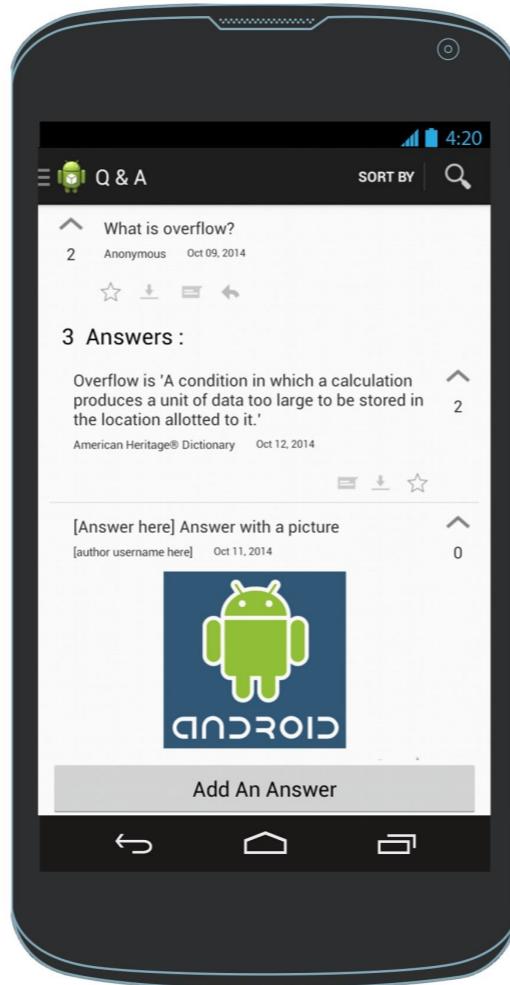

Failed attempt to attach a photo

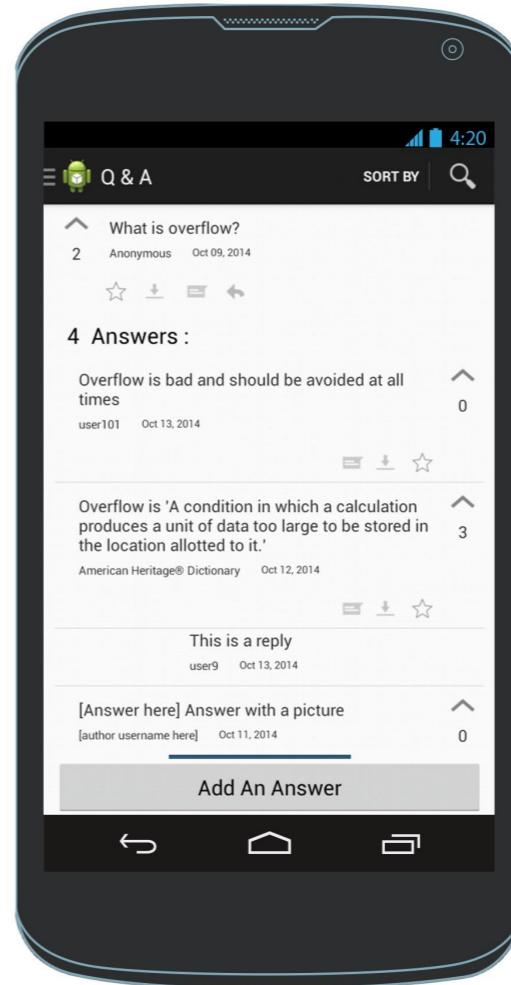

Variants of Q & A Screen

Some answers may not have a photo

Some answers may have a photo

Show replies of an answer

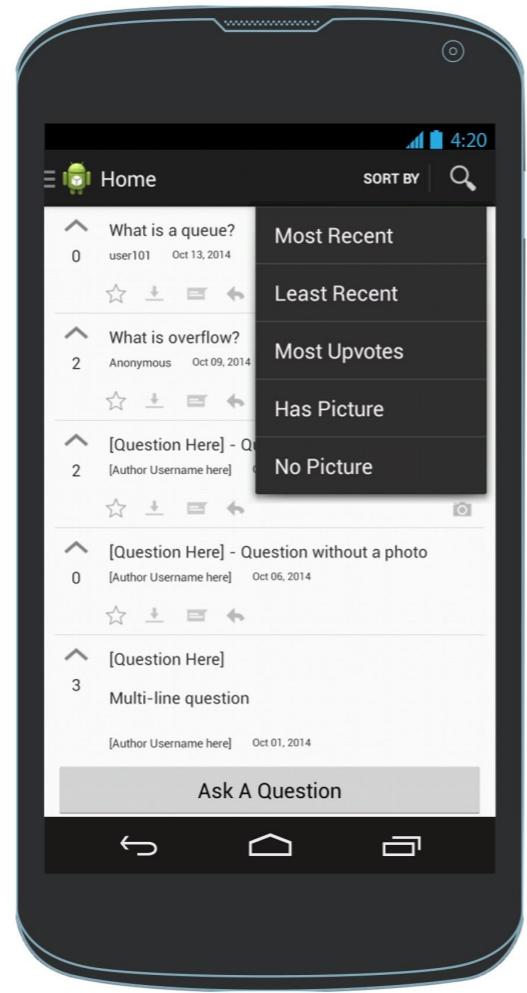

Note: Q & A screen is reachable from any screen showing question, by clicking on the question

Note: Default view is to show answers **without** the replies.

Note: User clicks on an answer to see the replies of that answer

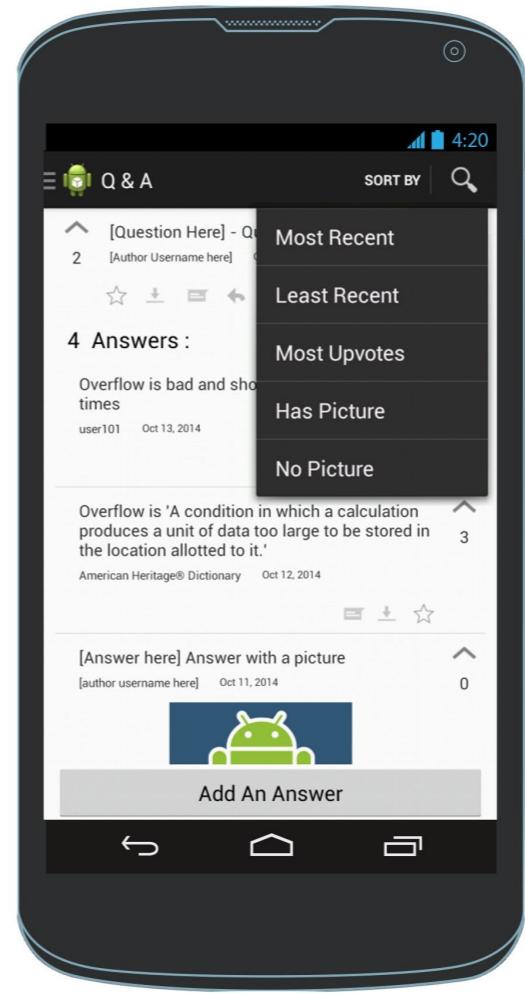

Note: Inflate a different list_item_answer xml file for each answer in the list adapter depending on whether the answer has a photo or not, indicated by the photo indicator.

Sorting Question & Answers

Can sort questions

HomeScreen

Can sort answers

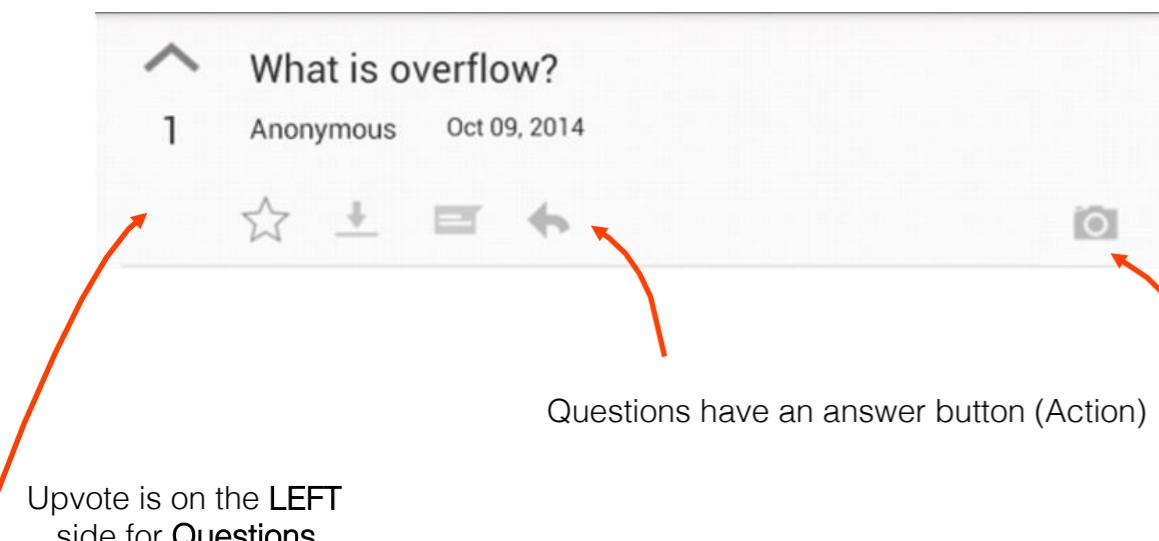

Q & A View

Note : Only sorts answers by criteria selected if on the Q & A Screen

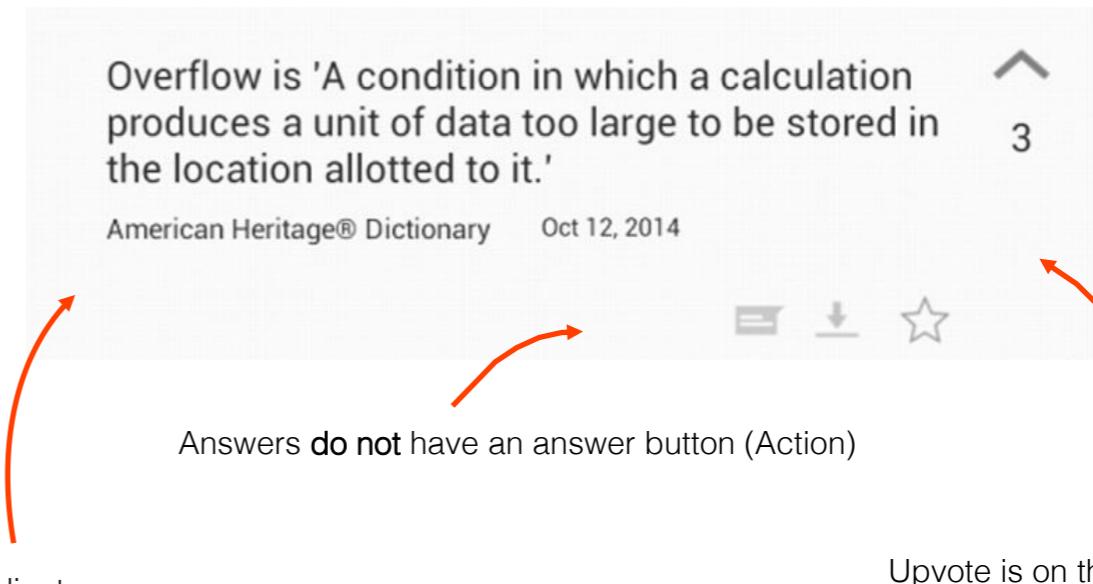

Note : Else the "SortBy" menu selector sorts the questions

Question & Answer List Item Layout

Question

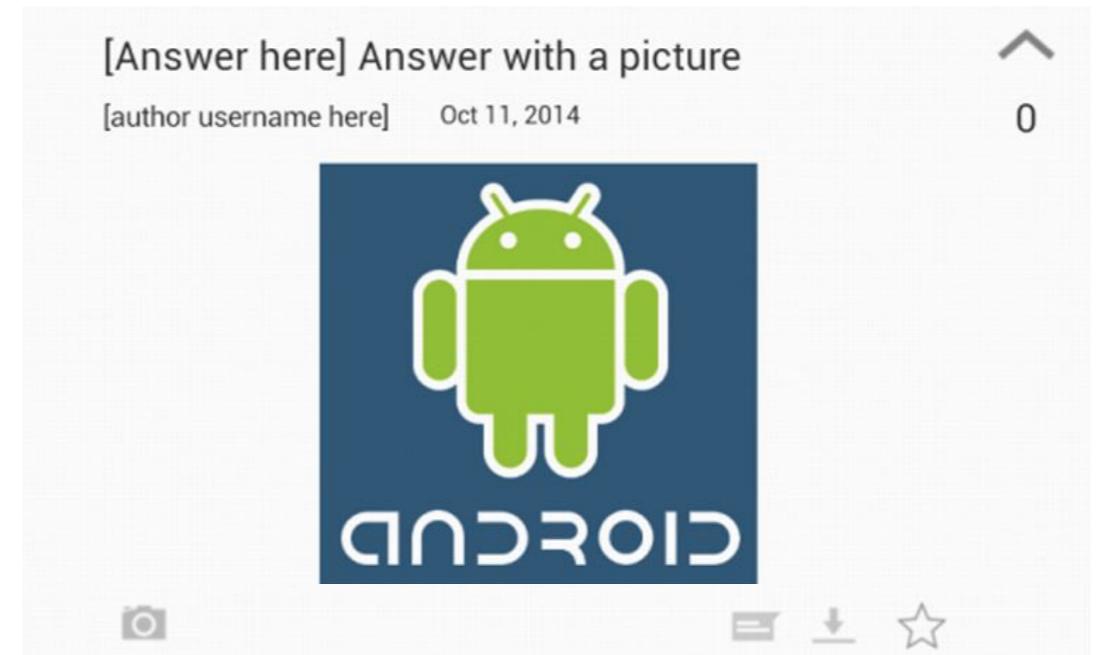

Answer

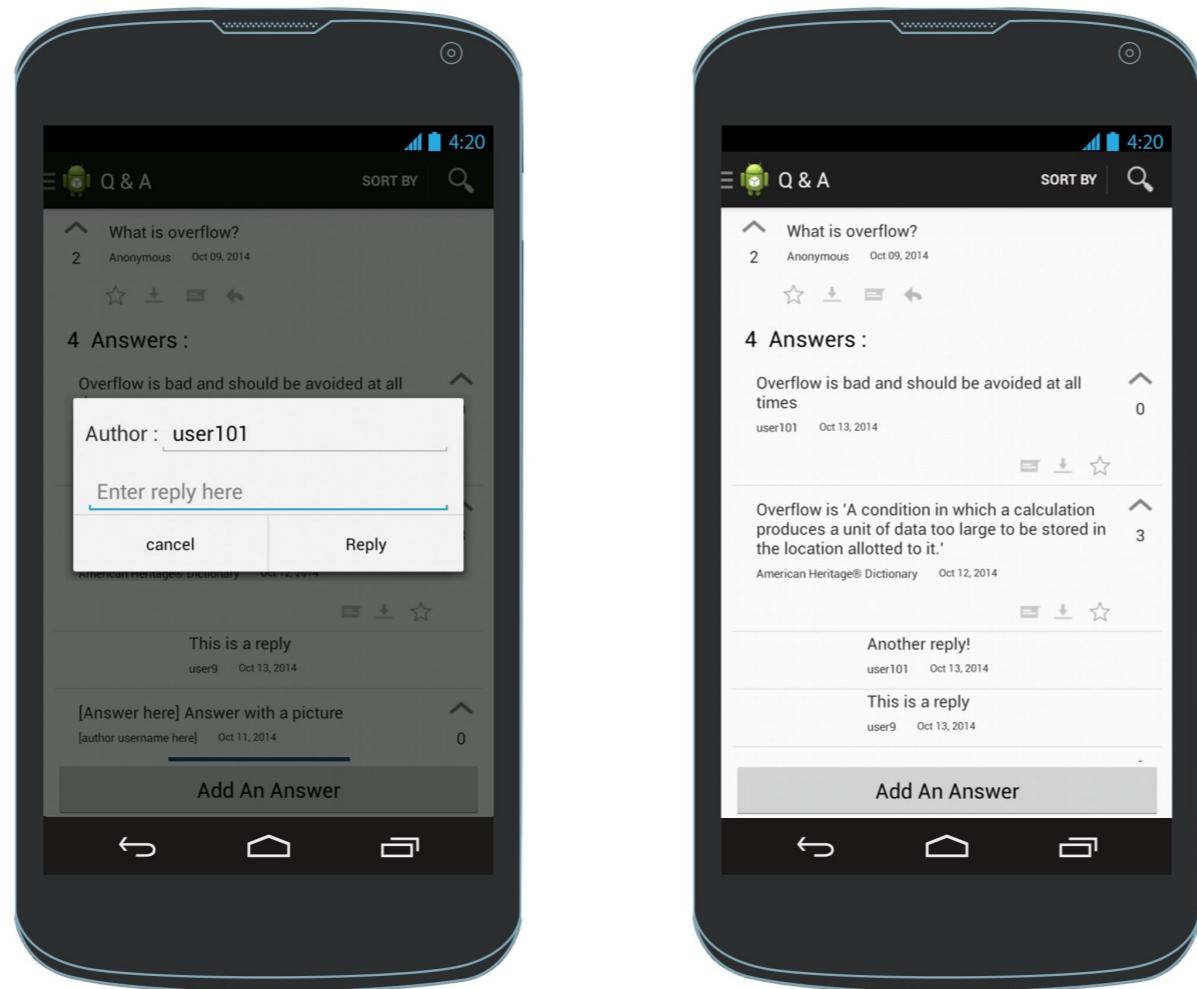

Note :A question with a photo is displayed by default when in Q & A Screen
Note : But a photo corresponding to a question is not displayed by default on any other screen.

Note : To view the photo corresponding to a question, the user must click on the question to go to the Q & A screen.

Adding & Viewing Replies

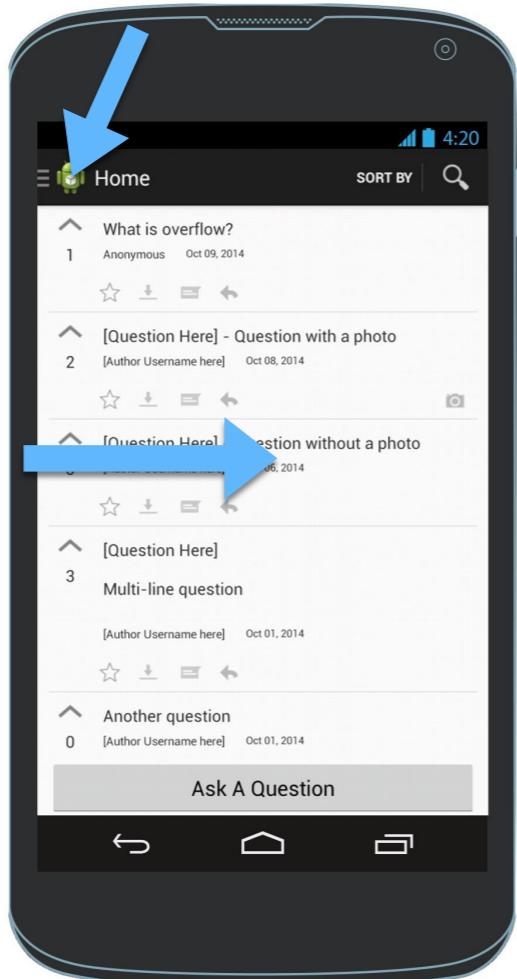

A dialog is used to make/add a reply.
